

Dear General Secretary of the Hellenic Open University, Dear Colleagues and Dear Students

The **Wi-CoNet** Programme is finished today. Four (4) European Universities with an approved scientific experience on Wireless Technology Spent a great effort to Organize this Project and to offer you an Intensive course that is FOCUSED on the Wireless Communication Technology by covering some basics, mainly advanced and showing the latest scientific issues on this area.

Starting from ZILINA, passing through GRAZ and ending here in PATRAS, I recall you the main focusing issues of the lectures (theory and laboratory work) you had:

From the technology point of view the course was focused on the Terrestrial Wireless and Satellite Communications systems

From the current scientific research point of view the course was focused on the Design and Technology Convergence issues of these wireless systems

From the End User point of view the course was focused:

- First on the offered communication services standing mainly on the dominant provided service based on the reliability of the users geographic position.
- Second on the QoS issues by examining the status of various wireless channels, fading phenomena, Diversity techniques, Technical parameters of multiuser systems and resource allocation techniques

The success of the Course and the obtained by you this scientific information DEPENDS ON YOU.

You've got a FINAL TASK:

- Go through again and again in your notes and try to re-organize this knowledge according to your scientific interests
- Try all together to be an international scientific team discussing various scientific problems and build on this knowledge
- Be connected with all the involved teachers of this course in order to get advices
- Try to keep your friendship. This is the most important think

Finally:

We are proud of you because you have successfully attended this course. You have been examined by FORCING you to answer 24 questions. The range of the correct answers was between 19 to 22 out of the total 24 questions. All of you have PASSED successfully this course.
